

# Challenge Your Team With CLI's 3 Levels of Team Challenge!

CLI is the expert in providing custom-designed high-impact team challenge programs. We offer three levels of programming to allow you to experience the level of challenge that your groups prefers.

Our ropes course is located just west of Chicago, and we can arrange a half-day, full-day or multi-day experience. Combine your learning needs with our expert design and facilitation skills, and you have an unforgettable experience.

## Choose from three levels of adventure:

**1. Group ground initiatives:** These highly interactive group "games" are not games at all. Each initiative focuses on a specific learning theme, and participants are drawn in on the fun. Once they experience an initiative, the facilitator processes

the key learnings - so the group learns from their own experience.

**2. Low ropes course:** The low ropes course is hidden, tucked away in secret areas at our adventure site. Each low ropes activity offers increased challenge, and requires trust, open communication, and commitment to complete. The low ropes course offers a balance of challenge, learning and achievement.

**3. The high ropes course:** The extensive high ropes course offers a powerhouse of opportunity for your group to learn to be a high

performance team. The high ropes course provides a testing ground for doing the impossible and for achieving mutual goals beyond the team's wildest dreams.

## **A word about our policy: Challenge by Choice**

CLI is a leader in experiential learning. We have a proven track record and years of design and facilitation experience. We believe in challenge by choice. Each individual has the right to make

their own decision about their level of involvement and participant in experiential learning. CLI has created an inclusive training model so that every participant is involved in experiential activities, in direct experience or support roles. Contact is to learn more about our inclusion values.

## **Why Choose Us?**

CLI's employees are master facilitators in experiential learning. We have designed and facilitated experiential training all over the globe. We offer portable low ropes programs from the training room to even the most unique venues.
